# Our Delivery Methodology

---

# Secured Infrastructure

---

## Physical Security

- Biometric access to the production floor to avoid any unauthorized access to client data
- Individual lockers are allotted to every employee to keep their belongings & avoid taking unwanted things to the production floor
- 24/7 manned security
- CCTV for close monitoring of the production floor
- Fire security and fire-fighting equipment's are installed in the office premises

## Network Security

- Password protected access to work station for each employee
- USB ports and other external media drives are disabled
- Web traffic of each workstation is monitored by the IT department
- Regular anti virus updating on every computer system

## Value Proposition

---

- Comprehensive and **end to end niche ICT recruitment services** to alleviate your staffing worries
- **Extended support** for multiple positions and bulk resource requirements
- **Fast TAT** (Turn Around Time) for efficient and improved recruitment experience
- **Flexible and Scalable** in being able to deal with short-notice and new resource requirements
- Secured Infrastructure - **ISO 27001:2013 (ISMS)**
- Quality management system in place - **ISO 9001:2015 (QMS)**
